PROJECTS

SMEARGLE'S HEART   (Ruby / Rails, React / Redux, PostgreSQL, AWS S3)   live | github
A single-page web app that is inspired by DeviantArt, which is a social media website for illustrators.
- Incorporated AWS S3 in the Rails backend as a way to allow users to upload and retrieve images.
- Utilized React-Modal to make editing a user's profile seem more convenient and provide a cleaner UI
- Implemented frontend validation logic so a user can't like the same imagination more than once

HUDDLEUP   (MongoDB, Express, React / Redux, Node.js)   live | github
HuddleUP allows you to host sporting events so you never have to play alone.
- Implemented the Google Maps API for geocoding on the frontend to show the locations of the events
- Communicated remotely in an effective way using Git and Zoom during COVID-19

BLADE BOY   (JavaScript, Webpack)   live | github
Blade Boy is a game where you run and jump from platform to platform to reach the end goal.
- Used strictly JavaScript and HTML5 Canvas to render everything frame by frame, so the character appears that it's moving.
